

The H₂O Maximizer addresses hard water related issues and does so much more:

Home:

- Control and remove mineral scale build-up and corrosion of appliances, fixtures, and pipes
- Reduce residue on dishes, shower doors, toilets, sinks, and counters
- Use 20 to 50% less soaps and chemicals (making soap sudsier)
- Get whiter / cleaner clothes using less detergent
- Reduce chemical use in pools and spas
- Longer lasting cut flowers
- Clean more effectively
- Reduce energy costs
- Increase flow rates

Health:

- Eliminate the negative impacts of using a salt based water softener
- Eliminate harmful effects of chlorine
- Promote healthy immune system
- Efficient metabolic waste removal
- Improve the taste of your water
- Deliver complete hydration
- Soften hair and skin
- Balance body pH

Lawn and Garden:

- Increase health, color, and vigor of lawns, plants, and gardens
- Improve water permeation into soil and soil moisture retention
- Reduce fertilizer and chemical inputs
- Reduce water use by 20%
- Improve soil pH

H₂O Maximizer Whole Home System

Improve water for the entire home. Install on the main water line to treat the entire home and garden.

Available in PVC, Anodized Aluminum, and Stainless Steel

Hose Mount System

Portable design, 3/4" hose thread. Easily installed on a hydrant, garden hose, power washer, motor homes, campers, Etc. Available in Anodized Aluminum.

H₂O Maximizer Funnel System

Portable and easy to use for any liquid: simply pour through the funnel for instant treatment.

SOFTEN WATER NATURALLY

Maintenance Free.
No salt, chemicals, or power required.

For home, health, lawn and garden

Hard water and your home

Hard water leaves deposits on faucets, toilets, shower doors, and plumbing fixtures. Over time, these scale deposits build up, affecting the efficiency and lifespan of appliances, hot water heaters, and plumbing components.

Hard water also dries hair and skin and limits the ability of soaps, shampoos, and chemicals to lather and clean effectively.

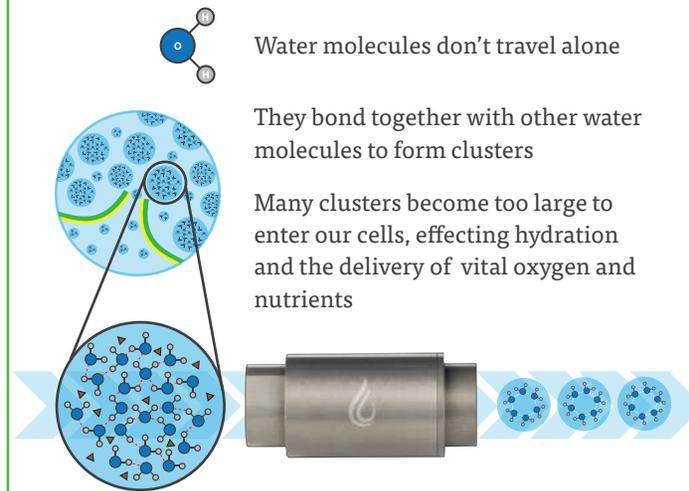

Salt based softeners are effective; However, they:

- Are expensive
- Require ongoing maintenance of buying, storing, and loading salt
- Have a negative impact on your septic system and the environment
- Increase salt intake into the body

The H₂O Maximizer uses magnetic technology to effectively soften water without the use of salt, potassium, chemicals, electricity, or any other inputs. There is absolutely no maintenance, by-products, or filters to change and comes with a 10 year warranty.

Simply install it and enjoy the benefits of soft, healthy, bio-available water.

Here's how the H₂O Maximizer works

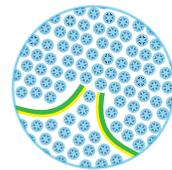

Water molecules don't travel alone

They bond together with other water molecules to form clusters

Many clusters become too large to enter our cells, effecting hydration and the delivery of vital oxygen and nutrients

H₂O Maximizer breaks apart these oversized clusters into smaller, more bio-available sizes while also breaking down minerals into a form which cannot create scale

The Result: Water can easily enter and exit cells to hydrate and remove toxins

H₂O Maximizer water achieves optimal hydration using less water and also delivers more oxygen and nutrients while flushing toxins from the body. Superior hydration supporting optimal health and wellness.

With the H₂O Maximizer you'll instantly notice the difference in your water's softness, smell, taste, and hydrating effects. And in turn, you'll find you will now enjoy drinking your water.

A one-time investment in the H₂O Maximizer provides years of healthy, energized water for drinking, cooking, and bathing enjoyment without the negative effects of hard water or chemical based softeners.

The H₂O Maximizer treats many water issues such as:

- Water Hardness – Calcium Magnesium (CaMg)
- Calcium Carbonate (CaCO₃)
- Bicarbonates (HCO₃)
- Increases dissolved oxygen
- Hydrogen Sulfide – (rotten egg smell)
- Boron toxicity
- Iron Bacteria
- Chlorine
- Acidity (pH)

Addressing issues:

- Mineral scale buildup
- Limited water supply
- Poor water quality
- Odor & taste issues
- Hard Water
